Today

No formal presentation

Make sure the beer is cold, meet, geek out

To discuss:

Meeting day/time: 4th Tuesday of each month? 7pm?

Proposed topics from the survey in order of popularity:

- Web scraping
- Big data handling (1 volunteer for dplyr)
- Machine learning/data mining (1 volunteer for PCA)
- Shiny apps (1 volunteer)
- ggplot2
- R markdown (1 volunteer)

Volunteers at ALL levels of expertise are absolutely welcome

Some thoughts:

Connecting via Twitter/LinkedIn/other could be useful to us all
(I'm thinking job postings, community troubleshooting)

Let's please use the discussion board on Meetup!

Or is there another suggestion (e.g. Slack)?
